

THAT'S EASY...

Founded in 1935, Paslode has become the world's leading manufacturer of timber to timber fastening systems. Driven by customer backed innovation, Paslode remain uncompromisingly focussed on accreditation, approval and quality.

Our Eurocode 5 compliant Paslode nails were the first on the market to achieve CE marking and are manufactured to perfectly accompany your Paslode tool. When used along with Paslode fuel, the full Paslode system provides a consistent optimised fixing performance, delivering a clean, flush finish even in the toughest materials and poor weather conditions.

WE ARE THE LEADING BRAND THAT:

CAN GUARANTEE EUROCODE 5 AND BS5534

- Paslode nails have excellent corrosion performance and therefore consistently meet the corrosion requirements outlined in Eurocode 5.
- Paslode nails are consistently compliant with Service Classes
- Paslode 3.1 x 63mm Galvanised Plus Ring shank nail will equal or better the performance of batten fixings outlined in the British Standards BS5534

HAS THE HIGHEST DRIVABILITY: 90MM SMOOTH

- Technical Data sheets and Declaration of Performance are available on our website www.paslode.co.uk.

OUR PREMIUM FIXINGS

EXCELLANT CORROSION PERFORMANCE

- Our nails consistently meet the corrosion requirements outlined in Eurocode 5.
- Paslode GALV-PLUS® nails are based on 15 -18 microns pre-galvanized wire.

HIGH BEND RESISTANCE

- Provides quality joints you can trust.

ALL WEATHER PERFORMANCE

- Our colour paper collation system provides easy out of the box Service Class identification and provides a delivery system that reduces blank and misfires, even in poor weather.

RELIABILITY

WHAT IS THE GUARANTEE?

Characteristic values are calculated or tested according to EN14592:2008 and A1:2012, except for the Paslode PPN square twist nails which are declared according to ETA-09/0273.

EUROCODE 5 SERVICE CLASS

Eurocode 5 regulation stipulates that all nails manufactured comply to EN: 14592. Paslode nails meet or exceed corrosion requirements stated in Eurocode 5 (EC5), thus suitable for relevant applications in service class 1,2 and 3.

EUROCODE 5 SERVICE CLASSES

Service Class 1 INDOORS	Service Class 2 INDOORS NOT HEATED, OUTDOORS PROTECTED	Service Class 3 OUTDOORS, EXPOSED TO WEATHER
BRIGHT

MADE IN EUROPE

The manufacture of nails requires an entire industrial process that uses the best technology and raw materials and complies with the latest European standards. That's why we pay careful attention to the quality of our nails. Our nails are made by our European production plants, tested in rigorous quality control measures and delivered through reputable supply chain assurances.

PREMIUM QUALITY NAILS YOU CAN RELY ON, NO MATTER THE JOB.
