What should I do if my tap is dripping/leaking?

Cleaning the valve (if water dripping from tap)

Before carrying out any maintenance, turn off the mains water supply. If unsure contact a qualified tradesman.

- 1. Remove the cap, grub screw and handles.
- 2. Remove the valve using a suitable spanner, clean thoroughly under cold water to remove any build up of limescale or debris.
- 3. If necessary replace the valve.
- 4. Replace the valve into the body, tighten the valve using a suitable spanner.
- 5. Replace the handles and indices, tighten the grub screw and re-fit cap to handles.

What does the Guarantee Cover?

The Guarantee covers leakage, manufacturing defects and chrome plating.

The guarantee does not cover:

- Damage or defects caused by:
 - general wear and tear (including special non-chrome finishes; components such as filters, seals, 'O'rings and washers)
 - incorrect installation
 - repair using non- PPI parts
 - accidental or wilful misuse
 - corrosion and the use of inappropriate cleaning products.
 - system debris including the build up of limescale (which can be controlled through regular servicing and maintenance).
- Compensation for loss of use of the product or consequential loss of any kind.
