## CERTIFICATE OF APPROVAL

### No CF 5531

---

This is to certify that, in accordance with  
TS00 General Requirements for Certification of Fire Protection Products  
The undermentioned products of

**D. P. GARG & CO. PVT. LTD**

**B-210 B,Phase – 2 Gautam Budh Nagar Nodia-201305 (U.P) India**  
**+91 120 2460085/86/97**

Have been assessed against the requirements of the Technical Schedule(s)  
denoted below and are approved for use subject to the conditions  
appended hereto:

---

#### CERTIFIED PRODUCT

Range of Tubular Latches,  
and Mortice Locks and Latches

#### TECHNICAL SCHEDULE

TS23 The Contribution of  
Locks and Latches to The  
Performance of Fire Resisting  
Doorsets

Signed and sealed for and on behalf of Exova (UK) Limited trading as  
Warrington Certification

Paul Duggan  
Certification Manager

Issued: 2<sup>nd</sup> May 2017  
Revised: 21<sup>st</sup> July 2017

## CERTIFICATE No CF 5531

### D. P. GARG & CO. PVT. LTD

---

#### D. P. Garg - Tubular Latches and Mortice Locks and Latches

1. The tubular latches, and mortice locks and latches covered by this certificate are all steel cased. The approval applies to the products identified in Annex A, B and C.

The range consists of tubular latches and mortice locks, lever locks and cylinder locks. All are manufactured with mild steel bodies with mild steel or stainless steel forends and strikeplates. The range is available with latchbolts of cast zinc or brass, and deadbolts of cast zinc, brass and mild steel. The followers are of either cast zinc or brass.

The mortice locks and latches have a forends that vary from 20 mm to 26.5 mm wide, and 58 mm to 235 mm high which are available square or radiused. The cases are all 15 mm wide.

2. This approval relates to their use with the following door assemblies:-

**Tubular latches in Annex A - Latched and unlatched, intumescent sealed door assemblies consisting of timber faced and edged leaves with timber, cellulosic or mineral cores in timber frames having a fire resistance up to 60 minutes (Code ITT).**

**Mortice locks and latches in Annex B - Latched and unlatched, intumescent sealed door assemblies consisting of timber faced and edged leaves with timber, cellulosic or mineral cores in timber frames having a fire resistance up to 60 minutes (Code ITT).**

**Mortice locks and latches in Annex C only - Latched and unlatched, intumescent sealed door assemblies consisting of timber faced and edged leaves with timber, cellulosic or mineral cores in timber frames having a fire resistance up to 120 minutes (Code ITT).**

**Mortice locks and latches in Annex C only - Latched and unlatched, door assemblies consisting of uninsulated or insulated metal door assemblies in metal frames with or without intumescent seals having a fire resistance up to 240 minutes (Code IMM/MM).**

3. This certificate is designed specifically to demonstrate compliance of the product or system with Approved Document B (England and Wales); the Technical Handbooks (Scotland); Technical Booklet E (N. Ireland). If compliance is required with other regulatory or guidance documents there may be additional considerations or conflicts to be taken into account.
4. This approval relates to the use of the above locks/latches in contributing to the fire resistance performance of timber based doorsets and metallic based doorsets, as defined in BS EN 1634-1 or BS 476: Part 22: 1987.

---

## CERTIFICATE No CF 5531

### D. P. GARG & CO. PVT. LTD

---

#### D. P. Garg - Tubular Latches and Mortice Locks and Latches

5. The locks are approved on the basis of:
- i) Initial type testing to EN 1634-1 and EN 12209
  - ii) An appraisal against TS23
  - iii) Certification of quality management system to ISO 9001.
  - iv) Inspection and surveillance of factory production control
  - v) On-going audit testing in accordance with TS23 requirements
6. The mortice locks and/or latches should only be used with door assemblies of proven fire resistance (as defined in BS EN 1634-1 or BS 476: Part 22: 1987), the critical aspects of the doorset construction are considered to be the material of the door frame, the leaf to frame clearance gaps and the lipping material. Attention should be paid to these details and these should not be amended from that previously fire tested. The following minimum specification shall be followed:
- Timber-based assemblies (Code ITT30 and ITT60):
- i) Door frame density - 450 kg/m<sup>3</sup> (30 minutes), 640 kg/m<sup>3</sup> (60 minutes)
  - ii) Door leaves shall have a minimum thickness of 44 mm for 30 minute applications and 54 mm for 60 minute applications.
  - iii) Lipping density - 640 kg/m<sup>3</sup>.
- Steel-based assemblies (Code MM/IMM)
- i) Door leaves shall have a minimum thickness of 44 mm for up to 240 minute applications.
  - ii) No additional intumescent protection is required.
7. When fitted to insulated ITT 30 or ITT60 timber or mineral composite door assemblies, the required intumescent protection shall be as follows:
- i) The required protection for 30 minute ITT applications will be 1 mm of mono ammonium phosphate or graphite intumescent sheet material, around the lock case and behind the forend and strike plate.
  - ii) The required protection for 60 minute ITT applications will be 2 mm of mono ammonium phosphate or graphite intumescent sheet material, around the lock case and behind the forend and strike plate and base of any backbox.
  - iii) Additionally for 60 minute applications, the perimeter intumescent fire seal within the frame/door edge shall by-pass the strike plate or forend by a minimum of 7.5 mm wide on each side (with the exception of the latchbolt lip where present).

*Note: Failure to install this protection will invalidate this certificate*

## CERTIFICATE No CF 5531

### D. P. GARG & CO. PVT. LTD

#### D. P. Garg - Tubular Latches and Mortice Locks and Latches

8. Timber/mineral-based assemblies (Code ITT 90 and ITT120)

D. P. Garg locks and latches in Annex C shall only be fitted in 90 and 120 minute doorsets which have previously been tested with locks/latches of a similar size and specification, subject to the following requirements:

- i. The required intumescent protection shall be as tested by the chosen door manufacturer. In all cases this shall be a minimum of a 2 mm thick mono ammonium phosphate or graphite intumescent sheet material incorporated around the lock case and a bedding of the same type and thickness of mono ammonium phosphate or graphite material behind the forend and strike plate/keep, however, this protection shall be increased as required based on the chosen doorset manufacturers test data.
- ii. Additionally the perimeter intumescent within the frame/door edge shall by-pass the strike plate or forend by a minimum of 7.5 mm wide on each side (with the exception of the latchbolt lead where present). Where the perimeter intumescent fire seal on the original test for the chosen doorset by-passes the locks/strikeplate by more than 7.5 mm, this shall be maintained on the doorset incorporating the D.P. Garg chosen products.
- iii. Where chosen doorsets are approved in latched configurations only, the chosen doorset shall have been tested with a minimum latchbolt of 11.5 mm and a maximum latch bolt throw of 13 mm.
- iv. Where cylinders are required the chosen doorset shall have been successfully tested with single or double cylinders as required.
- v. The chosen doorset shall have been successfully tested with a lock/latch of the following minimum size:

Component/dimension	minimum Size (mm)
<i>Basic lockcase</i>	
Forend width	22
Forend Height	235
Forend thickness	2.5
Case height	170
Case width	74
Case thickness	15
<i>Strike plate</i>	
Strike plate width	24 (exc. Lip)
Strike plate height	212
Strike plate thickness	1.2
Strike plate lip height	49

---

**CERTIFICATE No CF 5531**  
**D. P. GARG & CO. PVT. LTD**

---

**D. P. Garg - Tubular Latches and Mortice Locks and Latches**

8. Timber/mineral-based assemblies (Code ITT 90 and ITT120) – Continued

- vi. The D. P. Garg locks and latches are available in arrange of latchbolt and deadbolt materials, the following restrictions shall therefore apply:

<b><i>Tested bolt material on Proposed Doorset</i></b>	<b>Permitted D. P. Garg Bolt Material</b>
Zinc	Zinc, Brass or Steel
Brass	Brass or Steel
Steel	Steel

9. The mortice locks and/or latches and their associated strikeplates and keeps may only be fitted in the manner described in this certificate and subject to any limitations on the inclusion of locks/latches specified for the door leaf. This approval is applicable only to the specified locks used with door assemblies of proven fire resistance (as defined in BS EN 1634-1) and when using appropriate intumescent protection.
10. Lock assemblies not incorporating a latching mechanism shall only be fitted to proven unlatched door assemblies.
11. The locks/latches should not be fitted higher than 1100 mm from the spindle to the finished floor level of the surrounding floors.
12. Timber doorsets shall be installed in accordance with BS 8214.
13. The approval relates to on-going production. Product and/or its immediate packaging is identified with the manufacturer's name, the product name or number, the CERTIFIRE name or name and mark, together with the CERTIFIRE certificate number and application where appropriate.
14. The products identified within this certificate/assessment report are marketed under the brand names of GARG, GARGS, TUFF, ELITE, SICHERN, BASIC, BASICS, ESSENTIAL, JUPITER, MARS, EXCEL, FIRESTOP, UNIFIX, SHIELD, I-CE AND CENTURION. In all case the products are identical with only branding and packaging changing.

### D. P. GARG & CO. PVT. LTD

#### D. P. Garg - Tubular Latches and Mortice Locks and Latches

15. Doors are classified as the following types:

**Type MM** - 20 minute to 240 minute doorsets that consist of metallic leaves in metallic frames that do not contain intumescent materials in the frame to leaf gap.

**Type IMM** - 20 minute to 240 minute doorsets that consist of metallic leaves in metallic frames that contain intumescent materials in the frame to leaf gap.

**Type ITT** - 20 minute to 120 minute doorsets containing intumescent seals and consisting of non-metallic faced and edged leaves hung in timber frames

**Type ITM** - 20 minute to 120 minute doorsets containing intumescent seals and consisting of non-metallic faced and edged leaves hung in metal frames.

**Type ITC** - 20 minute to 120 minute doorsets containing intumescent seals and consisting of non-metallic faced and edged leaves hung in proprietary composite frames, of which the principal material is other than timber or metal but which may include any other materials.
